
PROJECT 6 WORKSHEET
CHECKING FOR VIRUSES

Name: _____ **Class:** _____ **Due Date:** _____

Scanning and Printing the Report

- Step 1:** When the analysis is finished, determine how to print the report and attach it to this Worksheet. If you encountered any problems, describe below.

Special Features

- Step 2:** Describe any of the special features of the software that you discovered. Describe what the features do.

Updating the Virus Scanning Software

- Step 3:** Describe the process that you must follow with your software and your particular circumstances on campus for updating the computer virus software on machines that you use regularly. You may need to study the software carefully to determine how this is done and also interview the technology support personnel on your campus.

Screening Macros on Your Word Processor

- Step 4:** Describe what you did to check your word processor for macro screening and how you enabled such screening.
